ED VISITS FOR OVERDOSE INVOLVING MEDICATIONS OR DRUGS WITH DEPENDENCY POTENTIAL

Overdose ED Visits by Substance in Last 12 Months

Please note min/max scales differ by substance, as a reference, data labels have been added to the month(s) with the highest counts by substance.

Note: Report is restricted to N.C. residents ages 15 to 65 years. Drug classes shown are not mutually exclusive, a person may have more than one drug overdose diagnosis code, therefore, a person may be represented in multiple lines in the graph above. ^Report is based on initial encounter, unintentional and undetermined intent cases only, for ICD10CM overdose codes of drugs and medications with dependency potential within T40, T42, T43, T50.7, and T50.9.

*Data is provisional; YTD (Year to date). NC DETECT is North Carolina's statewide syndromic surveillance system. There may be data quality issues affecting our counts. Population Data - U.S. Census Bureau, <http://quickfacts.census.gov>
