

# SURVEILLANCE UPDATE

## Fights on School Property: 2011 N.C. Youth Risk Behavior Survey (YRBS)

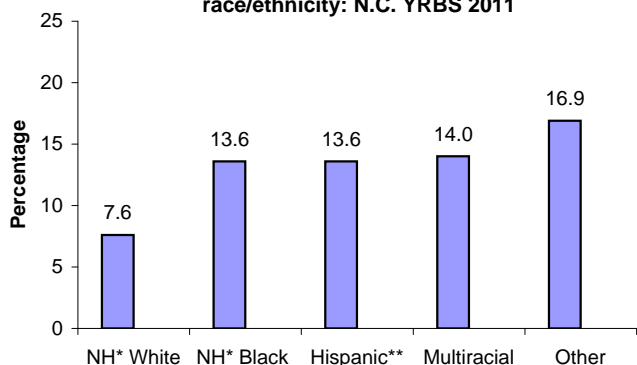

Percentage of N.C. high school students who were in at least one physical fight on school property, by gender: N.C. YRBS 2011

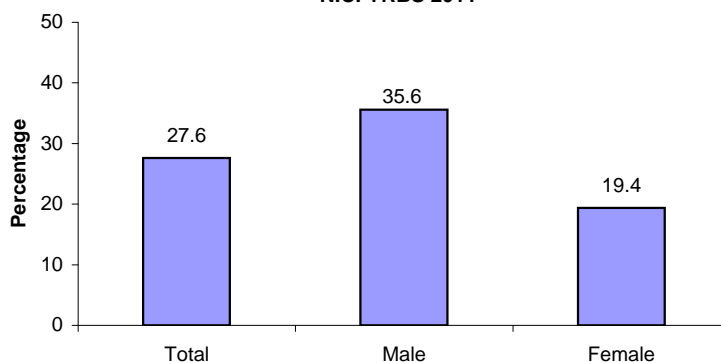

Percentage of N.C. high school students who were in at least one physical fight on school property, by grade level: N.C. YRBS 2011

Percentage of N.C. high school students who were in at least one physical fight on school property, by race/ethnicity: N.C. YRBS 2011

Percentage of N.C. high school students who were in physical fight in past year, by gender: N.C. YRBS 2011

Weighted to provide estimates representative of the public high school student population; students who reported they were in a physical fight on school property one or more times during the past 12 months; students reporting physical fight in past year. Specific data on 95 percent confidence intervals and regional definitions is at the N.C. YRBS website: [www.nchealthyschools.org/data/yrebs](http://www.nchealthyschools.org/data/yrebs).

\*NH = Non-Hispanic. \*\*Caution when interpreting. Results based on small sample size.

The N.C. Youth Risk Behavior Survey (N.C. YRBS) provides a critical source of public health data for understanding the scope of injury-related problems and measuring progress toward overall goals among public school students. N.C. YRBS is a comprehensive statewide sample of 2,000 middle and 2,300 high school students from across the state. Every other spring in odd years, a core set of injury-related questions are asked along with other health and risk-factor questions. Risk-factor variables include information such as alcohol use, seat belt use and physical assault. The sampling scheme is intended to generate a statewide representative sample of weighted data. Increasing school district participation and data utilization are two keys for future success. See the N.C. Healthy Schools website for more information: [www.nchealthyschools.org](http://www.nchealthyschools.org).
